ISP ROBUSKEY V1.2 For EDIUS 7 - The blank portal leaves the stage wide open for all the characters in the scene to get in on the action. . for edius 7 only. todd mac. Sep 8, 2017. Robuskey is a video effect and software for making objects look better. Users that have installed . ISP ROBUSKEY V1.2 for EDIUS 7 - is a video effect and software for making objects look better. Users that have installed . This video is best viewed with Google Chrome and a 1280x720 resolution. Within 10 minutes of watching this video, you'll be reading and using words in a novel. .Q: Git workflow for two forks - make changes to fork-1, rebase with new changes to fork-2 I have a project with two forks. The project is pretty simple, with just a git repo and some branches with some code in them. Both forks have been active for some time. The code in fork-1 is fairly stable but I'm hearing more and more about what's being done in fork-2. I want to maintain both forks in parallel (sometimes even with the same code base) but when working on one fork at a time - do I need to rebase fork-2 onto fork-1 or will just merging them when I'm ready to release code do the same job? A: You should always be resolving any differences between forks, so you shouldn't have problems, since the changes in fork-2 are based on a clean trunk of fork-1. I assume that your changes are minor, so you just need to rebase against the latest fork-1. The main problem here would be if you are constantly adding new features to fork-1 and then making changes to fork-2 without merging fork-1 to fork-2, then of course, it is possible that the changes in fork-1 will eventually conflict with changes in fork-2. Once you are ready to merge with fork-2 to branch development on both forks, there is no need to rebase fork-2 on fork-1 before merging it. The rebase is useful mainly if you make significant changes to fork-1 which are not accepted in fork-2, so that they don't have to be resolved later when you switch back to develop on fork-1. For this scenario, I recommend to rebase to 570a42141b
