Considerations for recombinant development of an oral vaccine for *Chlamydia trachomatis*. We describe in vitro and in vivo procedures to optimize the yield of recombinant *Chlamydia trachomatis* that contain the major outer membrane protein (MOMP) of their respective serovars. The recombinant MOMP genes were expressed under the control of the L and L2 ribosomal promoters that varied in strength. Expectedly, MOMP was expressed at higher levels when the L2 promoter was used for its induction in the recombinant strains. We compared the recombinant MOMPs produced using the L2 promoter with their native MOMP counterparts to demonstrate that recombinant proteins are able to incorporate into outer membranes and form oligomeric structures that are able to induce protective immunity in mice. We further demonstrated that several recombinant MOMP genes were able to induce protective immunity in immunocompetent mice when tested individually or in combination. We have developed a method for increasing recombinant MOMP yield in a recombinant vector, which is a potential vaccine candidate.

So the project was abandoned with the ship afloat, the former captain and his wife laid to rest and the ship become a tourist attraction. Calypso Shipping Co. owned the ship from 1938 through 2001 and her last trip under her own steam was in 2002. According to the book 'A Cure for the Common Sea Serpent', this was the last U.S. Revenue Cutter to serve in her days. When the salvage project started the pipe plank the ship was masted to was replaced with an iron

Q: How to use URL in ProxyPass? Here I want to redirect all requests to same php file to another port number. Is it possible to do with proxy pass or not? eg: ProxyPass / balnk.php balnk.php:8080/
Example A: No, it's not possible. You can do one of the two things: If you just want to redirect to another server, you can do something like: ProxyPass / balnk.php balnk.php:8080/ But then you need some kind of request forwarding like: ProxyPass / balnk.php balnk.php:8080/ ProxyPassReverse / balnk.php balnk.php:8080/ But ProxyPass is not possible on Apache.
