Towers of Minimalism is the fifth studio album by the Norwegian band Glass Candy. It was released on August 27, 2016 on Thrill Jockey Records. The album was recorded at Shangri-La Studios in Woodstock, New York and then at Echo Mountain Studios in Los Angeles. Additional recording took place with producer Jackknife Lee at the Sahara Sound Lab and Richard Swift at The Henson Recording Studios in Los Angeles. The album was ranked at number 88 on Sputnikmusic's 100 Best Albums of 2016 list. Concept Towers of Minimalism is Glass Candy's fifth studio album and the first to be composed as a concept record. According to Creem and the now deleted press release, the album is about "the rise of a consumerist existence and the freeing of the mind." Recording and production The album was recorded at Shangri-La Studios in Woodstock, New York in June and July 2016. The album was then pressed at Los Angeles-based Echo Mountain Studios. Composition began on February 6, 2016 with founding member Paul Meany and took approximately two months to complete. The band played their last show with Paul Meany on March 6, 2016. The first song recorded in Stone Canyon Studios, with Jackknife Lee, was "Loneliest Place" (at 12:19). The song was based on the band's idea of experiencing a personal downturn, a period of anxiety, or personal despondency. It was a "departure" according to band member Helene Riisland, who was supportive of the new direction the band had chosen and joined them in the recording studio. "Loneliest Place" was used for the track listing of the first pressing of the vinyl (from October to December 2016). The vocals of "Loneliest Place" was the last vocal recording of the album. It was out of proportion to the rest of the album, which was another departure. During the recording of the album, the band had a physical difference in the composition and direction of the songs. According to Helene Riisland, he had become more focused on his individual views. "Paul was more interested in his third person views," she said. "He and I had conversations on ideas that came from our two points of view." Meany says that he tried to counterbalance the anonymity of the recording studio by returning to his homes in New York

Utawarerumono: It Is an Everlasting Dream is a visual novel developed by Key and published by Otomate in collaboration with Type-Moon, produced with a new version of Otomate's vGen 3 engine, and localized for PAL by Silver Otter. It is the first game in the Utawarerumono series of visual novels. The game's narrative was written by the original author of 999: Nine Hours, Nine Persons, Nine Doors, 999: Nine Hours, Nine Persons, Nine Doors -Zero-, and its prequel/sequel Hatoful Boyfriend: Holiday Star. The story follows Hakuowlo, a young man who has been unable to remember his name for the past year. When he awakens, he is nursed back to health by an enigmatic girl with fuzzy ears named Celeste and a mysterious deer-human hybrid named Octavia, who tells him that they are his servants. Despite this, the villagers are suspicious of the newcomers and lock them inside a house, saving their goods for them. As the neighbors descend on their home, Celeste and her companion urge the villagers to accept them, before marching off on their own to find the town's elusive Mayor. Meanwhile, a land-buying nobleman named Quetzalcoatl searches the countryside for any marked ground that might attract his attention, and is accompanied by an equally obsessed parrot-man named Chrysanthemum. Upon Hakuowlo's return to the village after the fire, he and the other inhabitants make preparations for a journey to the big city of lenzo, where they will meet the mayor, find out more about the strangers, and hopefully solidify relations between their village and lenzo. If you've played or enjoyed other Otomate productions, then you'll know that the Otomate team, in addition to their vGen 3 engine, have some of the best artists in the industry working for them, so you can expect high production values and a personal touch. COMBAT

Utawarerumono: It Is an Everlasting Dream has a number of systems in place to bolster immersion in the world and story at large, in addition to the intricacies of battle. The first thing you'll notice as you begin exploring Hakuowlo's town is the little hints about the world around you, which will be the first thing they see. These little hints build a better visual map of the world for
