the bottom line is that reading is amazing for you. reading is best, and it is best to read every day (even if it is only 1 minute per day). reading is so important that, with the exception of art, movies and television, it should be the last thing you do before bed, the last thing you do after work, and the first thing you do every morning. when you are reading, you are so engaged, you may not even know that you are learning, that you are meeting new people, and that you are solving problems you didnt know you had. im not saying that you cant still be a couch potato, but why not throw a book on the pile next to the remote instead? your health and your future will thank you. the tips are simple. just read, and read every day. and remember that books are a great alternative to television. do not eliminate tv. it is a medium that is important to you and your family, but books are a vital part of your life as well. the first time i read the flying house i was immediately hooked, and i have read this book several times since. if you can get your hands on a copy of this amazing book, i highly
